2. Operation

—Precaution—

1. It is recommend to use the SONY CHF-90 type cassette tape for high quality recording. For other types, set the TAPE SELECT switch to the appropriate position. Refer to page 6 of the instruction manual for TC-D5M Cassette Corder.
2. Set the following switches on the Cassette Corder as below.

(1). Recording Procedure

Fig. 2 Recording Procedure

1. Set the REC-PLY switch to the **REC** position.
2. Depress the **PAUSE** button.
3. Depress the **FWD** and **RECORD** buttons at the same time.
4. Turn the **REC LEVEL** control clockwise until the **PEAK** indicator blinks. Normal setting is the position "5". Also confirm that the **PEAK** indicator blinks when speaking into the microphone with the press-to-talk switch depressed.
5. Depress the **PAUSE** button again, and recording will begin.
6. Depress the press-to-talk switch and speak into the microphone for recording of voice information.
7. Depress the **STOP** button to cease recording.

Note: 1. Depress the **PAUSE** button for momentary stop of recording.

2. The **FWD** and **RECORD** buttons are automatically released at the end of the tape.

3. If necessary, break out the small tabs at the rear of the cassette to prevent accidental erasure of video signal and voice information.

(2). Playback

Fig. 3 Playback Procedure

1. Set the REC-PLY switch to the position **PLY**, and the Color Video Sounder is ready for playing-back video signal and voice information.

Note: To display stored information on the FCV-200/201 Color Video Sounders, also set the CHANNEL selector of the EX-6 switch box to "TAPE" position.

2. Depress the **FWD** button, and stored video signal starts to be displayed on the CRT screen sweep by sweep with voice information being heard from the speaker.
3. Adjust the **MONITOR LEVEL** for optimum volume of voice information.
4. For momentary suspension of playback, depress the **PAUSE** button. Depress the **PAUSE** button once more for restarting the operation.
5. To cease playback, depress the **STOP** button.
6. Then set the REC-PLY switch to the position **REC**.

Note: The **FWD** button is released automatically at the end of the tape.
